Trudy

Great to meet with you, the Mayor and Dale this morning

Can the Council send Community Wind Farms Inc a letter of support for the Sandy Point project. A short note is sufficient

To date we have received strong support from the land owner base and in general conversation with local citizen comments have been very positive.

The project will provide many short-term jobs and many significant community benefits including business opportunities for many regional companies. It will also provide enough power to supply the needs of Shelburne, Queens and Yarmouth Counties

Also, can you recommend a half dozen location from around the whole Sandy Point peninsula including Branch Road for vantage point for us to take pictures to reflect the visibility of the turbines.

Thanks

Bill
